Лабораторная работа № 2 по курсу: криптография

Выполнил студент группы М8О-308Б-17 МАИ Милько Павел.

Задача

- 1. Создать пару OpenPGP-ключей, указав в сертификате свою почту. Создать её возможно, например, с помощью дополнения Enigmail к почтовому клиенту thunderbird, или из командной строки терминала ОС семейства linux.
- 2. Установить связь с преподавателем, используя созданный ключ, следующим образом:
 - 2.1. Прислать собеседнику от своего имени по электронной почте сообщение, во вложении которого поместить свой сертификат открытого ключа и сам открытый ключ (как правило, они умещаются в одном файле).
 - 2.2. Дождаться письма, в котором собеседник Вам пришлет сертификат своего открытого ключа.
 - 2.3. Выслать сообщение, зашифрованное на ключе собеседника.
 - 2.4. Дождаться ответного письма.
 - 2.5. Расшифровать ответное письмо своим закрытым ключом.
- 3. Собрать подписи под своим сертификатом открытого ключа.
 - 3.1. Получить сертификат открытого ключа одногруппника.
 - 3.2. Убедиться в том, что подписываемый Вами сертификат ключа принадлежит его владельцу путём сравнения отпечатка ключа или ключа целиком, по доверенным каналам связи.
 - 3.3. Подписать сертификат открытого ключа одногруппника.
 - 3.4. Передать подписанный Вами сертификат полученный в п.3.2 его владельцу, т.е.одногруппнику.
 - 3.5. Повторив п.3.0.-3.3., собрать 10 подписей одногруппников под своим сертификатом.
 - 3.6. Прислать преподавателю свой сертификат открытого ключа, с 10-ю или более подписями одногруппников.
- 4. Подписать сертификат открытого ключа преподавателя и выслать ему.

Часть 1: генерация ключа

```
gpg --generate-key
gpg (GnuPG) 2.2.19; Copyright (C) 2019 Free Software Foundation, Inc.
This is free software: you are free to change and redistribute it.
There is NO WARRANTY, to the extent permitted by law.
Note: Use "gpg --full-generate-key" for a full featured key generation dialog.
GnuPG needs to construct a user ID to identify your key.
Real name: Милько Павел Алексеевич
Email address: p.milko1999@yandex.ru
You are using the 'iso-8859-1' character set.
You selected this USER-ID:
    "Милько Павел Алексеевич <p. milko1999@vandex.ru>"
Change (N) ame, (E) mail, or (O) kay/(Q) uit? O
We need to generate a lot of random bytes. It is a good idea to perform
some other action (type on the keyboard, move the mouse, utilize the
disks) during the prime generation; this gives the random number
generator a better chance to gain enough entropy.
We need to generate a lot of random bytes. It is a good idea to perform

Content-Transfer-Encoding: quoted-printable

--dtihBuymNvhVuYZSzhhTPmvnYDttovhj6--

Сначала я подумал, что мне по ошибке пришёл дамп http-запроса, но потом я заметил строчку "Content—Transfer—Encoding: quoted—printable".

После перекодирования тела сообщения из этой кодировки я получил следующее: "Зашифрованное сообщение 3."

Часть 3: сбор подписей одногруппников

В качестве пробного одногруппника был выбран Алексей Куликов. Мы обменялись открытыми ключами и подписали их друг другу.

Теперь мой ключ выглядит так:

```
